Pricing

What does this include?

Competitor analysis

- SWOT analysis of your business and your competitors
- Understand competitor online presence and strategy

Google Business Profile

- Analysis of GBP and strategically linking / optimising this for strong SEO results

Keyword analysis

- Identifying relevant keywords used in Google searches
- Analysing your competitors key words
- Using these findings to strengthen web pages

Backlinking

- Engaging with your peers and respected authorities within your industry to link their Articles/blogs/web pages to your website

Website optimisation

- Meta descriptions to match the keyword analysis
- Correct H1, H2, H3, H4 headings
- Internal page linking
- All images optimised with correct titles

This step is completed as part of any website build completed by Boost Your Brand

Google Search Console & Indexing

This is where we tell Google to search your pages, increasing your authority score.

We also identify and fix any errors that Google find, thus removing your negative score.

Site Health / Authority score

Your site health and authority score is a regular moving target. These 2 factors ultimately determine how important your website is seen in the eyes of Google. We need to increase these scores as high as possible on a regular basis.

'SEO Master Program' Cost Structure

Initial setup (First 2 months)

The first 2 months will include the following:

- Building your custom SEO strategy specific to your website. This strategy will include a mixture of the below:
 - Keyword ranking
 - Backlinks strategy
 - Analysing your competitors' SEO strategies
 - Auditing your competitors backlinks
 - Optimising & re-wording content on your new website after analysing your competitors' SEO. This will include amendments to text & copy that was pasted across from your previous website into the new design template
 - Assessing coverage compatibility
- Creating a long term SEO plan on how to funnel more traffic to your website, including your social media activity plus much more.

Cost

- \$2,500+GST (One-off set up fee) for the 2-month period

Ongoing (Monthly maintenance)

The main reason that websites don't rank highly within organic Google searches is because of the lack of monthly maintenance with their SEO strategy.

Ongoing maintenance to your SEO strategy is as important as the initial setup.

Your competitors who focus on their SEO strategy on a monthly basis will always organically rank higher than you, so it's important that your SEO is maintained monthly to ensure your website is kept relevant in Google's eyes.

Cost

- \$800 p/m +GST (Ongoing monthly maintenance from 3rd month onwards)

Difference between SEO & Google Ads

Search Engine Optimisation (SEO) refers to techniques that help your website rank higher in organic (or “natural”) search results, thus making your website more visible to people who are looking for your service via search engines, mainly Google.

Comparing SEO vs Google Ads is a common discussion within digital marketing. They serve similar purposes, however the two are very different. It's a lot like trying to compare apples to oranges!

SEO is an essential long-term marketing strategy that will show long term results but may not have instant results. Google Ads are an optional but *valuable* part of a larger SEO strategy.

We've listed some of the significant differences below:

- Google Ads are paid advertising, while SEO is about ongoing work, maintenance and improvement to your website.
- Google Ads include a daily ad spend plus agency service fee, whereas SEO is mainly just an agency service fee with minimal subscription costs to various 3rd party platforms.
- SEO strategies can take weeks or months to yield real results, while Google Ads can deliver near-instantaneous bursts of traffic.
- Google Ads as a marketing tool can be turned on and off instantaneously, while SEO delivers consistent organic results over the long term.
- SEO results apply to most search engines, whereas Google Ads is specific to Google only.

For a new website, SEO is about playing the long game and requires regular SEO maintenance.
